

**Topic Name:** for eg. Development of Cubosomal carrier

**Author's Information:** for eg Abdul Muheem<sup>1</sup>, Sobiya Zafar<sup>2</sup>, Zrien Naz<sup>3</sup>, Mohammed Anwar<sup>4</sup>,  
Gaurav K Jain<sup>5</sup>, Farhan J Ahmad<sup>6</sup>

**Other Details:** for eg. Nanoformulation Research Lab, Faculty of Pharmacy, Jamia Hamdard,  
Hamdard Nagar, New Delhi-110062, India.

## **Abstract**

**(Brief introduction of your abstract Up to 250 to 500 words)**

For eg. Cardioprotective assessment showed a significant increase in SOD and GSH levels while a decrease in the level of CAT, CK-MB, LDH and lipid peroxidation was observed in animals pre-treated with developed CBMs..

## **INTRODUCTION**

## **RESULTS**

## **CONCLUSION**

## **KEYWORDS-**

Only speakers are requested to attached their Photograph and Biography upto 150 Words.

Deanna Mulvihill has her expertise in evaluation and passion in improving the health and wellbeing. Her open and contextual evaluation model based on responsive constructivists creates new pathways for improving healthcare. She has built this model after years of experience in research, evaluation, teaching and administration both in hospital and education institutions. The foundation is based on fourth generation evaluation (Guba& Lincoln, 1989) which is a methodology that utilizes the previous generations of evaluation: measurement, description and judgment. It allows for value-pluralism. This approach is responsive to all stakeholders and has a different way of focusing.
